

VILLAGE OF HOOSICK FALLS WATER USERS

WATER UPDATE

Information about Temporary Filtration and Flushing: 2/25/16

- The temporary filtration system is now operating on the Village's water treatment plant. The Village & state will soon begin to flush & clean the water mains and storage tanks throughout the system.
- The water mains & neighborhoods have been assigned zones. Flushing will occur in each zone followed by water testing for PFOA.
- People living in the first zone may be able to flush their plumbing as early as Sunday February 28. It will take about 2 weeks for all 6 zones.
- Please wait until you get a door hanger with instructions about how to flush your indoor plumbing, fixtures and appliances.
- During the flushing program you may experience discolored water and or pressure issues. This is normal during flushing programs.
- Flushed water will go to the sanitary sewer system which will carry it to the wastewater treatment plant. No flushed water is being sent to the storm sewer and or ground.
- Continue to follow the recommendation to use bottled water or in-home filtered water until further notice. Free bottled water continues to be available at Tops Friendly Market on Route 22.
